CARL GODLEWSKI

New York City, N.Y. | cgodlew@gmail.com | 347-224-9626
github.com/CGodl | **linkedin.com/in/carlgodlewski** | **carlgodlewski.com**

Full-stack engineer with 5 years of experience using React, Next.js, TypeScript, and Python. Seeking an opportunity to leverage previous experience in an exciting role with a collaborative team in the NYC area.

Work Experience

Senior Software Engineer **Prudential Financial** **December 2024 – February 2025**

- Reduced backend load and SQL query volume by 80% by redesigning Angular data services with centralized state management, improving application performance and scalability
- Improved data processing by reducing reliance on multi-page forms through the development of an AI-powered chatbot using Streamlit and FastAPI
- Designed and implemented a scalable data ingestion pipeline using Java, Spring Boot, Spring Batch, and AWS (S3, DynamoDB), reducing upload processing time up to 60%
- Modernized front-end architecture by migrating Angular features to application, building reusable components and optimizing rendering performance

Software Engineer **Freelance** **June 2023 – December 2024**

- Served as sole Full-Stack Developer for AI-based web application using Nextjs, TypeScript, Tailwind, Clerk, and Supabase with a PostgreSQL database
- Integrated back-end microservices utilizing Stripe webhooks with Supabase edge functions for payment processing
- Implemented end-to-end Stripe payment processing and Crisp customer service chat to the application ahead of the client's 3-day deadline
- Built out internal library to standardize RESTful API routes via React hooks for application

Software Engineer **Curate Insights** **May 2022 – June 2023**

- Directed front-end development of an internal data marketplace tool for Prudential Financial, managing a team and serving as final code reviewer, resulting in annual savings of $3 million and replacing clients' legacy software
- Resolved bottlenecks in API design, developing a React hook to standardize flow and error handling, reducing implementation time for all related tasks by 20%
- Optimized client processes for ingesting and displaying large datasets by streamlining API response structure from back-end, leading to a 40% reduction in development time
- Published an organizational guide on best practices and internal styling to address code quality and scalability concerns, reducing technical debt by 30%
- Developed organizational talent by driving 1-on-1 mentoring sessions with junior engineers, improving team productivity

Front-end Engineer **Garbo** **July 2021 – May 2022**

- Built and maintained the front-end of a React application used by over one million customers
- Leveraged AWS Amplify and Cognito in end-to-end development of user authentication system, resulting in a secure user registration and login process
- Designed a library of responsive React components based on Figma outline and firm's unique branding requirements
- Managed non-technical stakeholder concerns by translating concepts in system design phase into executable goals

Skills

- **Languages**: HTML5, CSS, JavaScript, TypeScript, Ruby, Python, Solidity, SQL, Sass, Tailwind CSS, GraphQL
- **Frameworks and Libraries**: React, Redux, MaterialUI, Node.js, Next.js, Ruby on Rails, Jest, Cypress, Webpack
- **Development Methodologies**: Agile, Scrum, DevOps, CI/CD
- **Tools**: AWS, GCP, Git, BitBucket, Figma, Jira, Microsoft Power BI, Excel, Postman

Education

- **Certification,** Apollo Graph Developer - Associate **2024**
- **Certification,** App Academy **Summer 2020**
- **Bachelor of Business Administration, Finance,** Zicklin School of Business, Baruch College **2013**
